

Falcon 3.0

Parts List Change

The number of disks in the *Falcon 3.0* package has been changed.

There are now four 1.2MB 5¼" disks in the 5¼" package instead of five 1.2MB 5¼" disks. There are now three 1.44MB 3½" disks and one 720K 3½" disk in the 3½" package instead of four 1.44MB 3½" disks and one 720K 3½" disk. The "Parts List" section in the *Release Notes and Communications Handbook* should now read:

Parts list

- Either four 1.2MB 5¼" disks or three 1.44MB 3½" disks and one 720K 3½" disk

This change in the number of disks does not affect the operation or the installation of the *Falcon 3.0* program. Please follow the instructions for installation (in the *Release Notes and Communications Handbook*) exactly as before. Once installed, the *Falcon 3.0* program will be identical to earlier versions.
